## Expert Training Seminar Vision numeric France - September 2006

Twice a year we receive our distributors from all around the world to exchange our experiences, present our latest developments and marketing / sales strategies.

Vision numeric always keeps on developing new strategic tools to support its sales forces. Above, a demonstration in front of an amazed audience...

Thanks to enriching team work and feedbacks, Vision numeric strengthens its international position. We do not only "say" our solutions are innovative and powerful; we "prove" it to the clients with demonstrations customized to their needs.

This is what our seminars aim at, to be as closed to the users as possible with pragmatic and efficient presentation.

After every product training; we exchange our sales methods and Vision numeric presents its sales/marketing plans for each territory. Ideas of campaigns, events and actions are developed.

Those moments are the opportunity to analyze the results of actions in each country and the benefits everyone can get from them.

Those 5-day seminars are very rich events for both parties on personal and professional aspects. They are the basis of Vision numeric success.
