

## 3DESIGN Contest: diploma ceremony at Baselworld

**Lyon, France – April 10th, 2006:** During the Baselworld show in Switzerland, Mr. Bonneton, CEO Vision numeric, congratulated Mr. Righi for his second place at the expert design contest organized with 3DESIGN and gave him his diploma. Mr. Bonneton adds « I am very proud to held this prize to Mr. François Righi from the Bijoux Concept company. Replies to our 3DESIGN contest were plentiful and we are very happy to see talented designers, as Mr. Righi, participate into this event. »

**Model by F. Righi, Bijoux Concept**

The chosen theme immediately inspired Mr. Righi and Mrs Dandliker, his associate at Bijoux Concept; both of them really enjoyed participating in this contest. The challenge and competitive environment really motivated this team. Mr. Righi admits « this contest limited to expert 3DESIGN users allowed us to measure ourselves to other users in terms of technical know-how as well as ideas and theme interpretation ». He adds « with the contest: there isn't any constraint or obligation, we can really do what we like. This also allows us to do something we wouldn't normally do », a fact many competitors confirm.

Excited about his model and third place at the contest, Mr. Righi is now impatient to begin his training with the other winners. Sharing his work methods and exchanging tips with other 3DESIGN users and experts is one of the goals of this expert seminar. Being in our headquarters makes it easier to share opinions and questions with the development and the technical support departments; both are used to answering to our users' needs.

With his solid technical background and 15 years experience in 3D and 3D programming 2D et 3D 3DESIGN. Used to exchanges and phone calls with Vision numeric development team, he appreciates this reactivity which qualifies their relationship. The expert seminar is another opportunity to learn from other 3DESIGN users, he even admits « the other two winners' renderings are really beautiful, I can't wait to meet these talented designers! ». Mr. Righi and Mrs Dandliker hope to progress with 3DESIGN before another contest and promise to be there.

from October until December 2005, user from around the world participated into this first 3DESIGN expert contest. The competition rewarded three winners for their magnificent jewelry designs under the Five Senses theme. The first and third prizes were respectively awarded to David Watt and Tiia Mannisto during the SpringFair trade show in the United Kingdom in February. François Righi won second prize of the contest with a beautiful flower ring that clearly evokes all the five senses. The three winners were offered a special three-day expert training that will take place in our office in June, the first prize winner was also offered the newest version of 3DESIGN along with a service contract.
