## Watch & Jewellery Trade Fair

Prague, Czech Republic  
September 22 – 24<sup>th</sup>, 2005

---

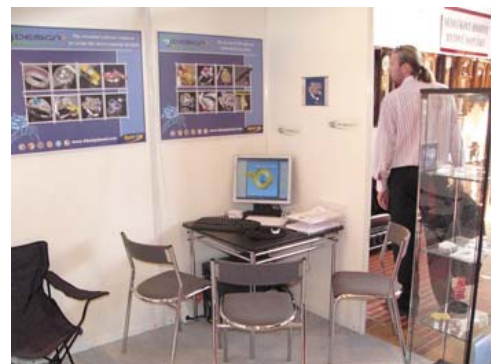

From September 22nd-24th 2005, our official Czech reseller Hana Vrbova assisted to the Watch & Jewellery Trade Fair in Prague. This show was a unique opportunity to promote 3DESIGN in the Eastern Europe countries. The jewellery industry is booming along with growing economies and interest for new technologies has never been higher.

Hana, our reseller was very enthusiastic to meet such an interested audience at this 14<sup>th</sup> edition of the fair. Some of the contacts who came to the stand to discover 3DESIGN had read an article in "Klenotnik Hodinar" and were curious to see such a program in action. Their curiosity was satisfied with hourly general presentations of the solution or customized demos assured by Hana or one of her trained staff.

Our reseller also met with representatives from Solunka. This school works on a program to educate children and then train them as future goldsmiths. Representatives were very interested into 3DESIGN and the educational partnerships Vision numeric develops with jewellery schools and training centres.

Another meeting with a delegation from the Bratislava show coming up October 21<sup>st</sup> also resulted into positive output. Our team was asked to present 3DESIGN during the Bratislava show. A 40 minutes presentation of the solution and its main features and capabilities is now arranged and planned.

Another sign of how 3DESIGN and new technologies spark interest for the jewellery industry in Eastern Europe countries.
