

## Vicenza Oro1 January 16<sup>th</sup>-23<sup>rd</sup> 2005

Our official subsidiary in Italy: **Vision numeric Italia** (VNIIt) held an attractive booth at Vicenza Oro. A delegation from our headquarters came along to support our subsidiary's efforts at this mandatory European show.

For more information about **our Italian subsidiary**, please visit: [www.type3.it](http://www.type3.it) and feel free to contact them directly at: [info@type3.it](mailto:info@type3.it)

This first 2005 edition welcomed an impressive number of visitors from central Europe countries like Hungary, Czech Republic, etc. as well as the usual European, Asian and Indian visitors.

Our team encountered a huge success in presenting **3DESIGN**, the ultimate software solution for jewelry design.

Many machine manufacturers and jewelry designers asked for customized demos of 3DESIGN. The ability to create in 3D instantly impressed them the most.

All of them appreciated the **Parametric construction tree** next, the software's overall **ergonomy**, the new free creation, etc.

As usual during the Vicenza show, our solutions' capabilities and ease-of-use impressed and seduced many visitors. As a result, be sure to find us there again next year!
